The right direction, said Mayor Don Clark with CAMP Associates – the facilitator who oversaw the plan. "The City of Idaho Springs has also pledged support and provided funding for the project in the past of the process.

"The big thing is about getting people involved on the right paths, and so we can work on the right things on the right paths, because that’s how you get to where you want to go," said Clark.

The City of Idaho Springs has already made a sizable contribution, totaling about 100,000 dollars, to the project. The company has also made a pledge to cover the project’s costs, should the plan not be approved through the process.

**study**

Confined on Main:

A study on the feasibility of a new aquifer was done by the U.S. Geological Survey and was funded with a $1.4 million grant from the state.

The study was originally planned to conclude early next year, but the City of Idaho Springs has asked to see the draft of the study by this Friday, said Mike Anderson, the director of the City’s department of water resources.

The study found that an aquifer could be created by diverting water from rivers and streams to recharge the aquifer. The City of Idaho Springs has already expressed interest in the project, said Anderson.

**Sensr**

Confined on Main:

If any expansion work is planned, it will be based – at least at first – on the data collected in this year’s study, said Anderson.

"The data collected this year is important to their community," said Anderson. "It’s important to their community because of the potential for increased water supply."

HAGERMAN — County commissioners are1,500 miles away in Boise, planning a future for Eastland Drive in Hagerman.

But back in the high desert of Hagerman, a small group of volunteers is working to keep the roads and the town moving. The Hagerman Clinic, a Title X provider for women and family planning, is in the middle of a long-term care plan for the town.

Hagerman Clinic's director, Linda Fields, said the clinic has been able to afford such a service with the help of the Center for Healthy Aging.

Fields said the clinic has been able to afford such a service with the help of the Center for Healthy Aging. The Center provides a service called “Developing a Long-Term Care Plan,” which is a program designed to help people plan for the future.

The program includes an assessment of the individual’s current health status, a review of their medical history, and a discussion of available long-term care options. The plan is then developed based on these factors.

Fields said that the clinic has been able to afford such a service with the help of the Center for Healthy Aging. The Center provides a service called “Developing a Long-Term Care Plan,” which is a program designed to help people plan for the future.

County asks for input in comp plan revision

By Nate Poppino

It was just last year that Twin Falls County officials finished reviewing the county’s comprehensive plan.

Now, they’re seeking guidance from county residents as they apply those revisions to the county’s zoning and subdivision code.

A series of three open houses about the proposed changes ended Friday in Kimberly, and will be one of several opportunities for the public to weigh in on the work.

Cooperating with Logan Simpson Design, which has offices in Arizona and Utah, officials plan to adjust the other ordinances to match the comprehensive plan. They’ll also clean up other issues, including where aircraft are allowed to land and how businesses can run out of homes are treated.

Residents who attended two open houses in Buhl and Twin Falls on Tuesday offered thoughts on four general issue areas: main sewer district, water, land use, and air quality.

The effort is only in its initial information-gathering phase, said Jim Carter with Logan Simpson Design. His company will take this feedback and other comments to the Planning and Zoning Commission sometime around March. The draft of the revised ordinances should come back to the public for more input. A first public meeting is planned for April.

More meetings will be held, although dates have not been finalized. The county also will hold a meeting at the middle school in Rice.

Farmers protest planned power line

IDAHO FALLS — Idaho Falls Power officials say the city-owned utility’s main transmission line is at capacity. Yet farmers in the region say they don’t want to see a new line run through their land.

The Post Register reports the utility is considering nine potential routes for the North Loop Transmission project. Nearly all would impact the rural New Sweden neighborhood.

In a letter to The Post Register, farmers expressed concern about a floating plane wouldn’t be able to fly and be forced to reconfigure the lines. Thiel says that would be devastating. He says they don’t want a new line through their area.

Nearly all farmers said they don’t want a new line through their area. But utility officials say that isn’t the case.

How the recession has changed Idaho

Hard times have changed us.

A survey released by the Census Bureau shows that life in Idaho has been altered in ways that many of us have not noticed. The survey, which includes data from 2006 to 2008, shows that the recession has had a significant impact on the state’s economy and demographics.

For example, the number of households in Idaho that are below the poverty line has increased by 60 percent. Nearly 18 percent of Idahoans — 266,000 people — live below the poverty line, according to the survey.

Moreover, the number of working parents whose spouses were also employed increased by 20 percent. The number of householders who are raising their grandchildren has increased by 60 percent.

These changes have had a significant impact on the state’s economy and society. Job losses and declining wages have affected many families, and the state’s budget has been hit hard.

However, despite these challenges, there are signs of hope. Idaho’s economy is starting to recover, and the state is taking steps to ensure that its citizens are prepared for the future.

We hope to stimulate discussion and promote understanding of all this.

McCauley an excellent choice for Buhl mayor

I have had the honor of knowing Kay Bailey Hutchison for many years. Since childhood, I have known her to be a dedicated, hard-working public servant who does not think in small terms.

Kay Bailey Hutchison will bring vision, integrity and excellence to the mayor’s office in Buhl.

Hutchison was a top leader in Congress, where she served as a chairwoman of the Senate Commerce Committee and the Senate Appropriations Committee. Now, as mayor of Buhl, she will bring her unique qualifications and considerable experience to the heart of the community.

Hutchison will be a strong leader who will work hard to deliver quality services and infrastructure to our community. She will champion the importance of education and bring her extensive network of contacts to the city of Buhl.

Hutchison’s background as a Texas rancher and businesswoman will give Buhl a mayor who understands the needs of our community, particularly our small businesses.

I believe Kay Bailey Hutchison will make an excellent mayor for Buhl and its citizens.

Jack Goodman

Seating policy unfair at county fair events

I’ve been a Twin Falls County Fair-goer for many years. I applied the manage- ment for a seat and was told I would have to wait until Wednesday to receive my seat, plus they only have a few left.

I have attended the fair every year since I was a child and I have grown to love going there with my family. They are a very family-friendly event and work hard to ensure everyone has a great time.

I recently attended the Twin Falls County Fair and was disappointed to find that there were no seats left for the next day. I was really angry because I had been looking forward to this event for months.

I would like to suggest that the management consider offering more seats for the public to enjoy the fair. It is important to ensure that everyone can enjoy the events and see their favorite acts.

I encourage others who have similar experiences to voice their concerns to the management.

What’s the deal with Glenn Beck, anyway?

Bob Price

The “do not listen” is typically a way of saying that they are not interested in the topic or issue. It is often used in a dismissive or condescending manner.

Glenn Beck is known for his conservative political views and his role as a commentator and radio host. His show, “Glenn Beck,” is syndicated on the Fox News Channel and is broadcast on radio stations across the country.

Beck’s show typically features a mix of news analysis, commentary, and interviews with guests. He is known for his strong opinions and his use of controversial language.

In recent years, Beck has become involved in political activism and has been involved in several controversies, including his support for the Tea Party movement.

It is difficult to say exactly what Beck’s show is about, as it can change from week to week. However, it is clear that he is known for his strong opinions and his ability to engage a large audience.

Overall, Glenn Beck is a controversial figure in the world of politics and media. His show is known for its strong opinions and its ability to engage a large audience.
Leaky dam triggers flood worries in Seattle

KENT, Wash. (AP) — For nearly 21 years Kathy Gladden has lived about 100 feet from the Howard Hanson Dam, which holds back the Green River less than 1 mile from the house before the dam was built. "I can't bear it. It's awful, " she says there would be a 1 in 3 chance of a flood in the Green River Valley. But Wright said he's "going to do everything possible to prevent flooding downtown, which is the only way to do it." The dam, located in the Cascadia foothills east of Seattle, has prevented major flooding in the Green River Valley since 1995. It started when last winter's heavy rains and snowmelt combined to create a flood threat. A 15-foot rises in rain fell in 12 hours on the Green River's upper watershed in Kent, January, sending torrents into the 219-foot-high dam's reservoir. The reservoir is more than 1,384 inmates. A 45-foot wide pile of rock was deposited by a huge landslide 10,000 years ago. As a temporary fix, the corps is spending $16.5 mil-

Golf and good homes
Par three course, top-notch residences to round out development in Filer

By Blair Koch
Times-News correspondent

FILER — Next spring Filer will have a new, nine-hole, par-three golf course. The area will also have a new high-end residential development.

Area malls, developers and bankers gathered at the Pebble Ponds development earlier this month to learn more about the multi-million dollar endeavor being undertaken by Filer real-estate agents Brian Dey and his partner, Ross Drown, who is also Dey’s father-in-law.

About 80 industry buyers in the region attended the luncheon, said Wells Fargo Loan Officer Tim Christ. The bank sponsored the event.

He said Dobbie Pond is a good example that the Magic Valley real-estate market isn’t completely Likewise.

“I think this development shows commitment in moving the industry forward,” Christ said. “There are new developments and we’re still doing construction locally. We’re actually seeing a lot of interest from people wanting to build and buy homes.”

Magic Valley Realty realtor Kathleen Hale has lots for sale within the development and said the project will likely look to building homes in the $500,000-600,000 price range.

“We still need to service that price range. Real estate goes through ups and downs and this shows there are opportunities out there,” Hale said.

One family has decided to move into the area, because of the new hospital, and there are three successful business owners throughout the area.

The program will have a

By David Crary
Associated Press writer

NEW YORK — Social service charities across America, the recession has delivered a staggering one-two punch. Sharp drops in donations and investment income have been coupled by soaring demand for their services.

The casualties so far include countless needy clients losing assistance and thousands of nonprofit workers who’ve been laid off. Some local charities have shut down, even more of the largest nationwide operations have made painful cutbacks in staff, spending and programs.

“Organizations are generally at the whim of the economy but we’ve never seen anything like this,” says the Rev. Larry Trinde, president of Catholic Charities USA.

Increased need for services and layoffs have forced community agencies to rethink how they operate and make changes that are likely to outlive the recession.

“Nonprofits, like regular businesses, are learning to do more with less. Those that survive will emerge more efficient.”

Recession delivers a double whammy

By Anamarie Azena
Wall Street Journal

WASHINGTON — The Federal Reserve proposed rules Thursday to better protect Americans from sudden hikes in interest rates on credit cards.

The central bank, which generally bar rate increases during the grace period before an account is opened, would allow a few exceptions, increasing the rate on existing credit card balances.

“Given a mindset to become more creative,” American Heart Association CEO Nancy Brown said.

Healthy, stable weight: A matter of women's health

The United States, the company's largest-ever U.S. recall. A Camry sedan is seen Aug. 16 at a Toyota dealership in Centennial, Colorado. Toyota Motor Corp. on Tuesday said it will recall 3.6 million vehicles in the United States, the company's largest-ever U.S. recall.

It should come as no surprise when women who maintain a stable weight are 12 percent less likely to reach a premature death, according to a study the researchers gave Tuesday. In addition, women who accumulated pounds during adulthood significantly raise their risk of premature death. Researchers found that the mothers whose kids were overweight two years after the birth of their first child were more than three times as likely to die young than those whose kids remained healthy.

"We have to engage towns, cities and community leaders to grow. Water use planning and land use planning need to be linked. … We need to work together. There is no simple answer to water shortages over the next few decades," said Ronald Wolcott, a California water resources expert at the University of California, Davis.

The study also found that women who maintained a stable weight were 28 percent less likely to have lung disease, heart failure and non-insulin dependent diabetes, as well as other chronic diseases.

The researchers examined data from the Women’s Health Initiative, a study of the health of 51,520 U.S. women who participated in the study. The women were healthy and had normal blood pressure, body weight and blood levels of cholesterol and triglycerides. They were not taking any medications that could alter blood lipids or blood pressure. They did not have any prior history of cardiovascular disease, cancer or stroke. They were randomly assigned to each of the two treatment groups. The women were followed up for an average of 8 years.

The researchers say they are the first to examine the association between weight and premature death in a large cohort of women.

The researchers found that women who maintained a stable body weight were 12 percent less likely to die during the follow-up period than women who had a gain of 30% or more in body weight. The risk of death was highest in women who gained less than 5 pounds and lowest in women who gained 5 to 9 pounds.

The researchers say they are the first to examine the association between weight and premature death in a large cohort of women.

Victims find way to relief centers

MANILA, Philippines (AP) — Flood victims bulldozed through ankle-deep sludge to crowded relief centers in the Philippines on Tuesday as the death toll rose to 65 from water that inundated the homes of nearly 2 million people.

Tropical Storm Ketsana brought the worst flooding to the Southeast Asian country in four decades, chasing some victims to their rooftops to escape the rising water and sweeping others down raging rivers.

The presidential palace was opened as an aid center, and President Gloria Macapagal Arroyo’s executive chef cooked gourmet food for victims at another shelter.

Ketsana strengthened and moved inland and approached Luzon, but rivers were still rising and Andrews said it was forecast for the region Wednesday.

In the Philippines, where at least 58 people remained missing and more rain was forecast, some of the displaced families had fled inland from a crowded coast in the town center where they sought shelter.

“What happened was the water suddenly rose. We did not know that the water would reach the second floor, so we went up to the roof but the roof gave in, so we just floated in the water holding on to a trunk of a banana tree,” said Herminio Alibat, whose wife was still missing. Alibat said he and his wife were swept to a river and eventually separated by the raging current.

Death toll at 246 in Philippines flooding

Floodwaters were around the Paoay River that cuts through the capital, including wealthy suburbs and slum towns.

The presidential palace was opened as an aid center, and President Gloria Macapagal Arroyo’s executive chef cooked gourmet food for victims at another shelter.

Alibat said he and his wife were swept to a river and eventually separated by the raging current.
CHICKEN-FRIED STEAK

2 pounds cube steak
3 cups milk, divided as needed
2 1/2 tablespoons flour
1/4 teaspoon salt
1/4 teaspoon paprika
1/4 teaspoon cayenne pepper
1/2 teaspoon black pepper
2 eggs
1 cup milk

1. Pound the cube steaks until about 1/2 inch thick. Place the prepared steak on one side until the edges start to brown (be careful not to crowd). Cook for 2 to 3 minutes, then turn and fry until the other side is golden, 2 to 3 minutes, adjusting the heat as needed.
2. Remove the steaks to a paper-towel-lined plate and keep warm. When the oil is sufficiently heated, fry the first four ingredients of the flour mixture, a tablespoon at a time, for about 30 seconds, whisking to combine.
3. When the oil is sufficiently heated, fry the second ingredient of the flour mixture, a tablespoon at a time, for about 30 seconds, whisking to combine.
4. Whisk the remaining flour mixture in the grease, creating a dark, brown gravy. Season with a pinch each of salt and pepper as desired, until the right consistency is reached. Turn to a low heat as needed. Whisk until the gravy coats the back of a spoon.
5. When the rice is golden-brown, while in 1/2 cups milk, fry the other side in golden, another 2 to 3 minutes, adjusting the heat as needed. Remove the steaks to a paper-towel lined plate and keep warm. Repeat until all the meat is ready.
6. Add a little extra oil if needed. Set the steaks aside, add a warm gravy.
Chicken tenders baked with potato chips

**Chicken tenders baked with potato chips**

---

**Chicken tenders baked with potato chips***

**Ingredients***

- 2 pounds chicken tenderloins
- 6 ounces potato chips
- 1/2 cup buttermilk
- 2 tablespoons flour
- 1/4 cup dry bread crumbs
- 1/2 teaspoon salt
- Fresh chives, more to taste
- Fresh thyme, more to taste
- Black pepper
- 1/2 teaspoon paprika
- 1/2 teaspoon cayenne
- 1/2 teaspoon dry dill

**Instructions***

1. Preheat oven to 350 degrees.
2. Remove chicken tenders from packaging, rinse and pat dry with paper towel.
3. Cut 1/4 inch off each end of chicken tenders and discard. Pat chicken dry with paper towels.
4. Place chicken tenders in a single layer on a large baking sheet.
5. Mix potato chips, buttermilk, flour, 1/2 cup bread crumbs, salt, black pepper, paprika, and cayenne until well combined. Mix crumbs with pepper, salt, and seasonings. Set aside.
6. Dip chicken tenders in the mixture, making sure they are completely coated. Place on a wire rack set on a baking sheet and pat dry with paper towels.
7. Bake until chicken reads 165 degrees, 12 to 15 minutes.

---

**Oatmeal crusted chicken tender recipe***

**Ingredients***

- 4 whole chicken tenders, 1 pound
- 2 tablespoons all-purpose flour
- 1/4 cup dry bread crumbs
- 1/2 cup cooked rolled oats
- 1/2 teaspoon black pepper
- 1/2 teaspoon garlic powder

**Instructions***

1. Preheat oven to 375 degrees.
2. In a shallow dish, combine the flour, bread crumbs, and oats.
3. In another shallow dish, combine the pepper and garlic powder. Dip each chicken tender in the flour mixture, then the crumb mixture.
4. Place the chicken tenders on a baking sheet and bake until golden brown, 15 to 20 minutes. Serve warm.

---

**Cheese grits***

**Ingredients***

- 3 cups grated cheddar cheese
- 1/2 cup milk
- 4 tablespoons butter
- 1/2 cup heavy cream
- 1/2 cup grated Parmesan cheese
- 1/2 cup grated sharp cheddar cheese
- Fresh chives, more to taste
- Fresh thyme, more to taste

**Instructions***

1. In a large saucepan, bring the milk and 1/2 cup of the cheese to a simmer over medium heat.
2. Add the butter, heavy cream, and the rest of the cheese. Stir until the cheese is melted and smooth.
3. Add the fresh chives and thyme, and season with salt and pepper to taste.

In my years as a foodie and then a food editor, I’d never made crepes. There were at least two reasons: (1) one of my best French friends makes a fabulous version, and (2) I fear the scanning—a little.

This recipe looked like a good choice for a Friday-dinner, so I was inspired to try them. And I’m happy to report that these crepes, from the book “Poitou French” by Jean-Pierre Challet with Jennifer DeCerte, are very good.

They were also delicious, stuffed with a creamy blend of goat cheese, herbs, and shad. And I enjoyed them with salad and a glass of white wine.

Serve these with a side of lemon wedges on the side. (and roe), if desired, with fillet bones. Spoon some of hot baking or gratin dish, and not too browned). The method lightens caramelizes the tops of the fillets and enriches their flavor while keeping the fish moist.

If you can’t get your hands on shad, this technique would work just as well for fillets of sole, catfish, or snapper.

Serve with boiled new potatoes. Adapted from Lamaño Lou Fowler’s “Savory Cookbook” (Gibbs Smith, 2008).

**BROILED SHAD**

4 servings

1 1/2 cups all-purpose flour 4 tablespoons unsalted butter, at room temperature

2 eggs, lightly beaten 1 tablespoon finely chopped parsley

1/2 cup grated goat cheese 1 clove garlic, finely chopped

Garnish with fresh parsley and fresh lemon juice. The Washington Post

Some days are better than others

The San Valley chef Cristina Ciacchi will teach a cooking class dubbed “Chef’s Italian A Cena” — that’s Italian dinner — next week at downtown Twin Falls’ kitchen-store.

It’s set for 7-9 p.m. Tuesday at Chef’s Panorama, 147 Main Ave. E.

Cost is $45.

If you never clipped a coupon before, consider what happens when the same price appears for a given item in several different stores. We’ve seen crackers on sale for $1.99 in the long-cycle flier, while in the short-cycle flier, the same crackers were on sale for $1.99. It’s just a matter of when you shop. The smart shopper who is in the store on the day they are discounted will pay $1.99, whereas the person who waits until the next sale date will pay $2.50.

A couple of tips: If you shop on the day the coffees are discounted, you may sit near the cash register and wait for the last 10 minutes of the sale, so that some of the tomatoes’ moisture returns and the coffee runs for seven days. This is considered “normal” behavior.

If you never clipped a coupon before, consider what happens when the same price appears for a given item in several different stores. Swine flu drive-thru

By Marta Falconi Associated Press writer

WASHINGTON — The top military health care provider for home 4,000 more U.S. troops leaving Iraq on Thursday, as the American military winds down the war in the country.

Army Gen. Ray Odierno said at a press conference Wednesday that 7,500 U.S. soldiers in Iraq are about to leave by the end of the month.

He said that would mean about 4,500 fewer troops in Iraq — about 5 percent of the size of an Army brigade. The announcement comes as the number of American troops in Iraq has reduced by more than 60 percent since the peak in 2007.

In his eight-page statement, Odierno cited data that showed the number of attacks in Iraq has sharply decreased over the last two years — down more than 9,000 in 2007 to about 600 last month. He also said that far fewer al-Qaida and foreign fighters remain in Iraq, and most of those who are left are disorganized and franchised ill-will that has been reported. By what Odierno described as a “small ideological core” of foreign extremists, Odierno’s concern is high because the U.S. interest was far from being fulfilled.

He predicted several looming problems as U.S. troops prepare to and combat missions in Iraq at the end of 2011.

A pair of truck bombings — one on Friday, Oct. 23, and another in the city of Kirkuk on Sept. 23 — have killed about 1,500 Iraqi civilians and security forces, and almost 100 U.S. troops, as the U.S. military faces down the threat of the largest militant grouping known as al-Qaida in Iraq.

“Al-Qaida in Iraq has yet to show us that it is an organization that is capable of mounting a sustained and continuous campaign in Iraq’s urban, sectarian and religious areas. He described a power struggle between provincial leaders in Baghdad and Sulaimaniya and said ongoing tensions between Arabs and Kurds.

Iraqi leaders who had planned to find government agencies, but al-Qaida’s leader, Abu Musab al-Zarqawi, revealed a “clear plan” to” al-Qaida in Iraq has yet to show us that it is an organization that is capable of mounting a sustained and continuous campaign in Iraq’s urban, sectarian and religious areas. He described a power struggle between provincial leaders in Baghdad and Sulaimaniya and said ongoing tensions between Arabs and Kurds.

Iran built nuclear site shielded from air attack

Iranian Vice President Ali Akbar Salehi, head of Iran's Atomic Energy Organization, listens to a question during a news conference in his office in Tehran, Iran, Tuesday.

The revelation that Iran built a second nuclear enrichment site was built for maximum protection from aerial attack earned it a mountain and a nearby military compound of the powerful Revolutionary Guard.

Iran's revelation that it built a second nuclear enrichment plant has raised international concern that other secret nuclear sites might exist as well.

Iranian nuclear chief Ali Akbar Salehi's statement came with a hard-line message: Abduction of crucial facilities like this one is a sure sign of U.S. and world powers — Iran will stand its ground and will be able to produce nuclear fuel.

The details emerging about the secret site near the holy city of Qom, where the first documented facility is being built inside a mountain, heighten suspicions Iran is trying to build a nuclear weapon, despite repeated denials.

Salehi, who is vice president and head of the Atomic Energy Organization, spoke at a news conference in his office Tuesday, Iranian state television and an Iranian government official reported.

The incident underscored the growing danger of military targets in much of Afghanistan, even on main highways, and the peril faced by civilians in such small-scale episodes as roadblocks to a road trip.

The nuclear暾s had been set off earlier this week in a smaller area of road between Western troops and Taliban fighters.

The revelations have raised international concerns targeting Iran's energy industries and telecommunications sectors if it does not comply with international demands, according to U.S. officials.

Hard-line Iranian lawmaker Mohsen Kakouei Rahimian thundered Tuesday that if the United States or its allies pressure Iran to pull out of the Non-Proliferation Treaty if it misses such calls to pull out of the past, saying that the issue remains committed to its obligations.

Salehi emphasized that Iran's talks with the International Atomic Energy Agency to see if there was a timetable for an inspection of the Qom site.

He said the country did not want a new round of a U.S. demand to allow an inspection within a week.

The nuclear force, named Nushabad or Lutan, is located in the force and sheltered, according to a news conference at the site, his country's new nuclear chief, Ali Akbar Salehi.

Salehi, repeating a long-held claim that other secret nuclear sites might exist as well.

Salehi said.

The revelations have raised international concerns targeting Iran's energy industries and telecommunications sectors if it does not comply with international demands, according to U.S. officials.

Tony — "Tone" James Nunez

Tony — "Tone" James Nunez was born on April 24, 1929, and passed away in Twin Falls on Thursday, Sept. 24, 2009.

Tony was very proud of his granddaughter, Ashley Lynn Nunez, who is in her first year of college.

Tony was known for his honesty, never afraid to speak his mind.

His loved ones will always remember his large heart, his smile, and his laughter.

In lieu of flowers, please consider donating to Hospice Visions, Dick’s Visions, and friends; and his funny stories, as well as many other acts of kindness.

We wish to THANK everyone for their help, prayers, sympathy and for the large amount donated to the St. Jerome Church Bldg, fnd a new home in Jerome, in memory of husband, father, grandfather, Dr. Ralph "Tone" James Nunez

Ann H. Titus

A memorial service will be held at 1 p.m. Thursday, Oct. 1, at Hall Funeral Chapel in Grants Pass, Ore.

Larry H. Huhler

Larry Howard Huhler, 79, of Twin Falls, died on Sunday, Sept. 28, 2009, at a Twin Falls hospital.

Arrangements will be announced by White Mortuary in Twin Falls.

Clarence D. Dudley

Clarence D. Dudley, 84, of Twin Falls, died on Friday, Sept. 25, 2009.

Arrangements will be announced by Remmel Funeral Chapel in Twin Falls.

**Linebacker Mackey makes plays for BSU**

By Donnie Lagry

Times-News correspondent

Boise State Linebacker and Senior Chad Mackey is the senior leader of the Boise State University football program. He is a two-time Academic All-American, and he is one of only a few players on the team who have played in every game of the program's history.

Mackey is a consensus All-American, and he is one of the top players in the country. He is a great example of what it means to be a student-athlete, and he has helped Boise State become one of the best programs in the country.

Mackey is a great leader, and he is a great player. He is a great guy, and he is a great person. He is a great example of what it means to be a student-athlete, and he is a great person.

**Kimberly cheerleader Coats comes home to complete rehabilitation**

By Wayne Nannini

Times-News correspondent

Tigers, Twins keep status quo with AM split

DETAINT — The Detroit Tigers (97-63) fighting for a second straight day in a critical two-game series against the Minnesota Twins. The Tigers won both games from them.

Verlander kept the Twins on top in the AL Central. Pulling together nine innings in a 4-3 victory Tuesday, that restored their two-game lead over the scrappy Twins.

"Verlander was the man of the game," manager Jim Leyland said. "He was going to be our man, and it was a great game for him."

It never is against the pesky Twins.

"They showed why they're so good," Detroit manager Jim Leyland said. "Minnesota baseball pretty much stands on the Twins when it isn't the offensive display on 9-10 innings. Brandon Lyon (6-5) set up Orlando Bush to pitch the ninth inning."

If Detroit can't take the twin games away from the Twins and Wednesday, they would still finish in third place. Central won't be decided until the weekend — or maybe October, with each team closing the regular season with a three-game set.

NBA going with replacement refs

The NBA has decided to go with replacement referees, days after the regular ones had been reached with locked-out officials.

The league announced Tuesday informing teams of its "reconsideration of concluding a timely labor contract." The memo alluded to the renewal, saying it is the first time that commitments made by the NBPA negotiating team were not honored by the commissioner. It previously ended one of the bargaining sessions when the league fired the referees backout of previously agreed upon concessions.

The NBA independent training camp will remain in place on the scheduled day of the first pre-season game.

NFL

Payne makes double eagle

LyNN Payne made a double eagle Sept. 20 on the 475-yard No. 14 hole at Barry University Courses. Payne fired out from 207 yards on his second shot, using a 7-wood. The shot was witnessed by Larry O'Leary, Wayne Back and McKay Price.

COLLEGE FOOTBALL

Georgia to face LSU in 2010

ATHENS, Ga. — Georgia has filled out its 2010 football schedule with a game against LSU and a home game against Middle Tennessee State.

The teams will meet Nov. 9, 2010, at Atlanta. The game will be played at the Georgia Dome. The story book Georgia senior, who was a key factor in the Bulldogs' 2009 conference championship, announced his decision to return for his senior season of eligibility on Monday.

BLAIR MATHERS (259) - The Hays Post - Blair Mathers is a longtime professional baseball writer. He's written for the Daily News-Record in Rome, Ga., the Johnson City Press and the Roanoke Times-Register in Virginia. His work has been featured in the Washington Post, USA Today, MLB.com, Baseball America and more. He has been a member of the Georgia Baseball Writers Association since 2005. Mathers has covered the Atlanta Braves, the New York Yankees and the Washington Nationals. He is a graduate of the University of Georgia with a degree in journalism. He lives in Columbus, Ga., with his wife, Sonya, and their daughter, Emily.
COPPENHAGEN (AP) — Rio de Janeiro is ready to make its Olympic bid to the International Olympic Committee. But the 2016 Games are still a decade away, and the city has to host the 2014 Games in what officials hope will be a prelude to hosting the Olympics.

Does it make the field, transformational change come to Rio? "Yes," says Olympic organizer Thomas Bach of Germany, "but the process is still in its very early stages."

"Vivaldi won the Olympic bid to host the 2014 Games in Rio de Janeiro in August 2009. The city is now working on the 2016 bid documents, which are due in February 2010.

The IOCs members will then decide whether to accept the bid or not.

Rio de Janeiro is currently a capital city with a population of 6.5 million in a metropolitan area of 14.5 million. It is located in the southeastern part of Brazil, on the Atlantic coast.

The city has a rich history, with a long tradition of hosting major sporting events. It was the host city for the 1920 Summer Olympic Games, and it has been selected to host the 2016 Summer Olympic Games.

The city is also known for its vibrant culture, with a strong influence from African and Portuguese traditions. It is home to some of Brazil's most famous musicians and artists.

The Olympic bid is expected to cost around $28 billion, with most of the funding coming from private investors.

The city is currently working on a number of projects to prepare for the 2016 Games, including the construction of new stadiums and facilities, as well as the renovation of existing ones.

The Olympic organizing committee is also working to ensure that the games will be safe and secure, with a strong focus on security and anti-corruption measures.

The city is expected to attract millions of visitors from around the world, and it will be a source of pride for the people of Rio de Janeiro and Brazil.

Overall, the Olympic bid is seen as an opportunity to bring the city together and showcase its unique culture and history to the world.
"Disobedience, in the eyes of anyone who has real history, is man’s original sin. It is through disobedience that progress has been made, through disobedience and through rebellion."

— Oscar Wilde

In this day from the 2006 World Series, the San Francisco Giants, with Barry Bonds at the helm, won their first championship. Bonds played a decisive role in the team's success, setting numerous records and inspiring his teammates. The Giants, under the leadership of manager Bruce Bochy, showed remarkable resilience and determination throughout the series, overcoming a tough Milwaukee Brewers squad to emerge victorious.

The 2006 World Series was a classic matchup between two teams with rich histories. The Giants, playing in their home ballpark, had a significant advantage. Bonds, the record-breaking slugger, was a key player in the team's offensive surge. His ability to hit home runs and drive in runs was a major factor in the Giants' success.

Against the powerful Milwaukee Brewers, the Giants showed their mettle. In a series filled with dramatic moments, Bonds delivered clutch hits and inspiring performances. His leadership and on-field presence were instrumental in motivating his teammates to perform at their best.

The Giants' victory in the 2006 World Series marked a significant milestone in their franchise history. It was a testament to the team's skill, determination, and the homegrown talent that had come of age in San Francisco. Bonds' role in this championship run cannot be overstated, as his contributions both on and off the field were essential to the team's success.
